

How to Assemble Our Beds

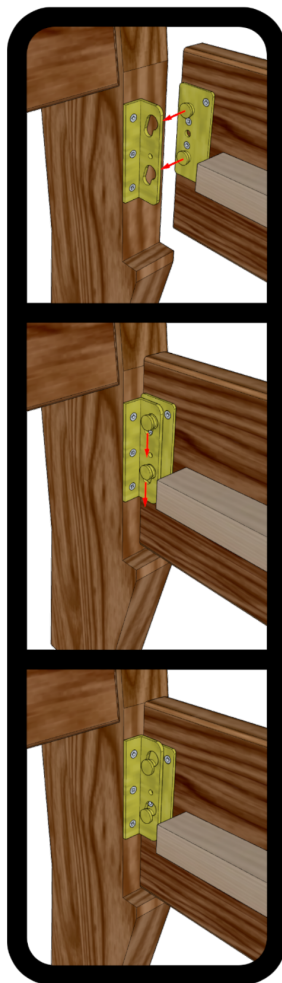

Set Includes:

Each of our beds come with mounting hardware that require no tools to assemble.

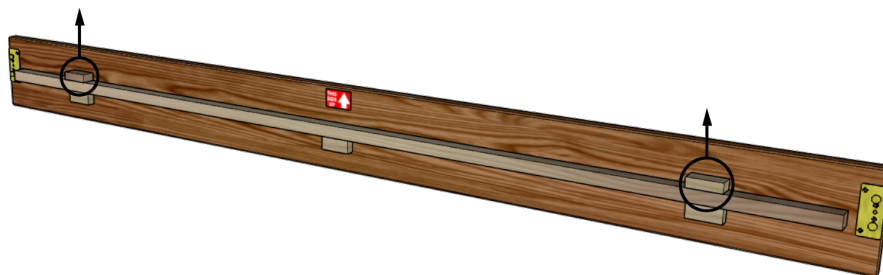

1. Insert the pins of the mounting plate on the Side Rail into the holes of the bed bracket.

2. Firmly press down on the Side Rail to lock it into place.

-Orienting the side Rails

If the Side Rails are not marked, indicating which edge is the top, just make sure that the side with 2 spacer blocks are facing up.

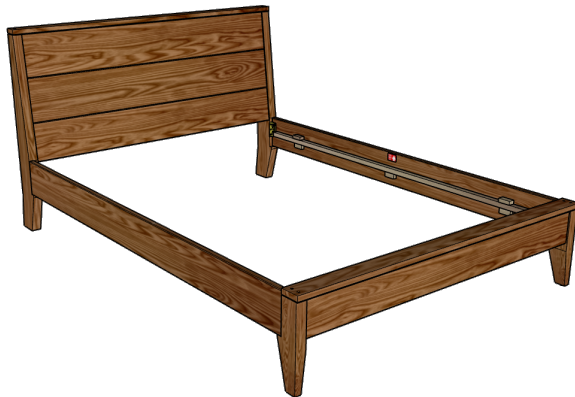

***It is recommended to have 2 people during the assembly process.**

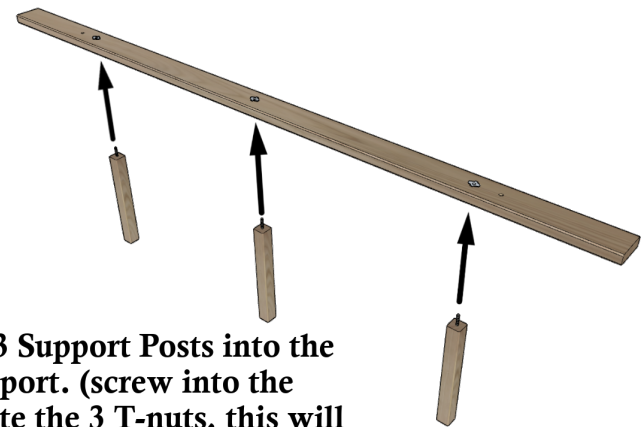

1. Gently prop the Headboard against a wall.

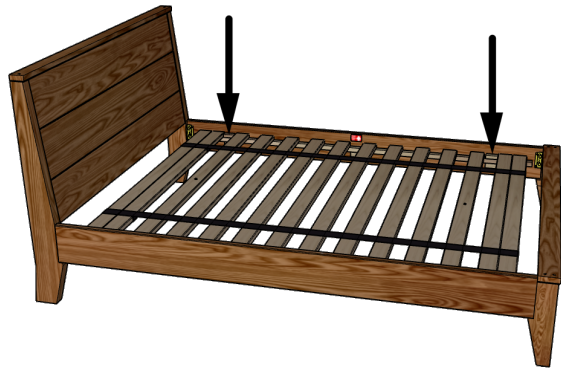

2. Connect the Side Rails to the Headboard

3. Connect the Footboard to the Side Rails.

**4. Screw the 3 Support Posts into the Center Support. (screw into the side opposite the 3 T-nuts, this will lock them into place)
-Set aside**

5. Place the Slat Set on to your assembled bed, locking them in place by making sure the end slats are over the Spacer Blocks of Side Rails.

**6. Slide the assembled center support under the bed and align the 2 remaining holes with the holes drilled in the slats.
-Secure with the provided 2" Bolts and washers.**

You are now ready to enjoy your solid wood, handcrafted bed.
